

Katie Merritt,

I am commenting on this proposed regulation change to healthcare for individuals and small businesses. I am against this proposal since it would require people of faith and others who are morally minded to permit gender change and abortion pills, going against our consciences. It is also likely to increase the cost of coverage. This proposal should be going through the legislative process and should not be done through regulation.

I am opposed to this regulation change. Thank you for allowing me to comment and make my voice heard.

Sincerely,
Becky Pickett
